

LAS VEGAS BROWNFIELDS PROGRAM

LAS VEGAS BROWNFIELDS PROGRAM

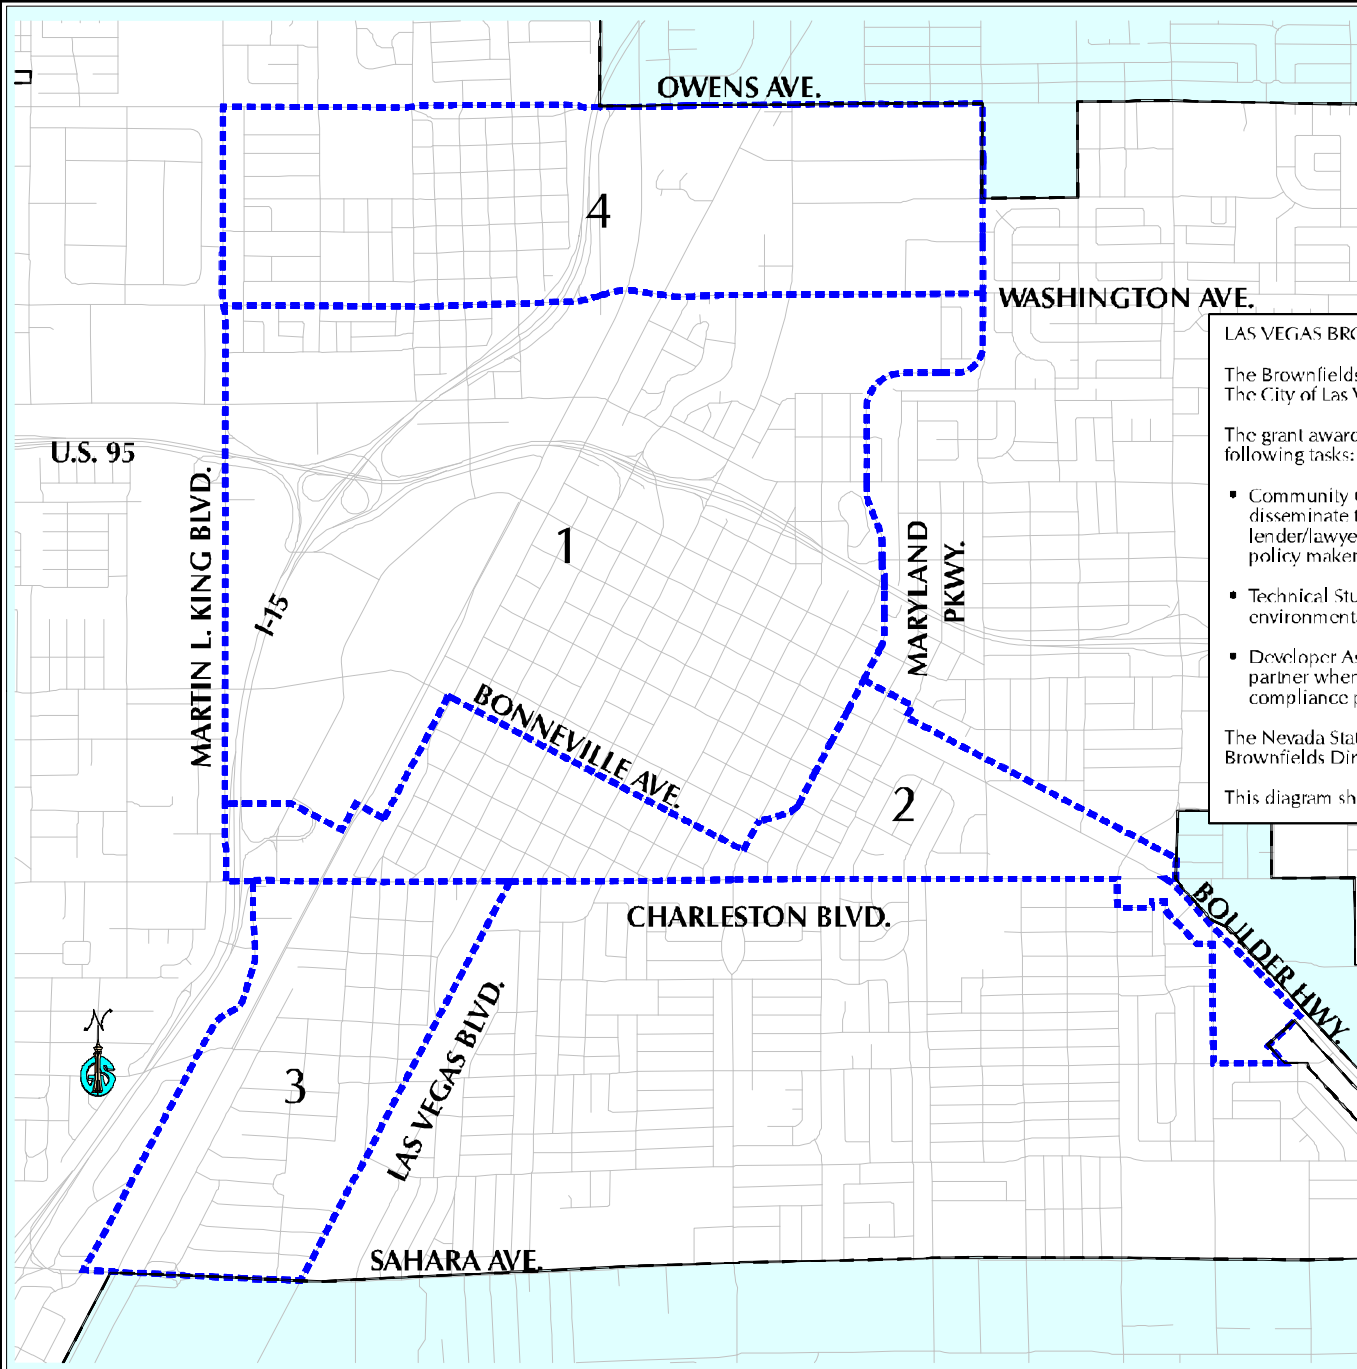

The Brownfields Demonstration Pilot Assessment Program is sponsored by the EPA. The City of Las Vegas became a Brownfields city in 1998.

The grant awarded to the City Redevelopment Agency will be used to perform the following tasks:

- **Community Outreach** - The City will inform stakeholders about the program; disseminate timely, accurate and pertinent Brownfields information to the lender/lawyer/developer/real estate professional community and inform policy makers on the impact of Brownfields to the community.
- **Technical Studies** - The City will perform Phase I & II studies to study environmental conditions throughout the Brownfields area.
- **Developer Assistance** - The City will take on the role of an interested partner when developers encounter obstacles to the environmental review/compliance process.

The Nevada State Brownfields contact is Ed Glick (702) 687-4670, the City Brownfields Director is Jeff Dix and can be reached at (702) 229-6351.

This diagram shows the limits of the Las Vegas Brownfields Study Area.

October 1998
